

JUANSTINI

THE KINGDOM OF JUAN

INTRODUCTION

- In this project we wanted to make a perfect country that could be created for retired rich people. The country would be a place where the rich would have their hard-earned peace with a side of party. We imagine this country to be like a normal island with its beaches, but with the addition of millionaire houses. Occasionally there are many festivals, collected from around the world, that would bring all the islanders together and would let them appreciate the different cultures. The island would use the production and selling of cannabis and the money made in festivals to pay the workers who maintain the island. Finally, in order to have a peaceful community with no political problems, the citizens would pay a one-time enrollment that would cover all the expenses they would be paying a government in taxes.

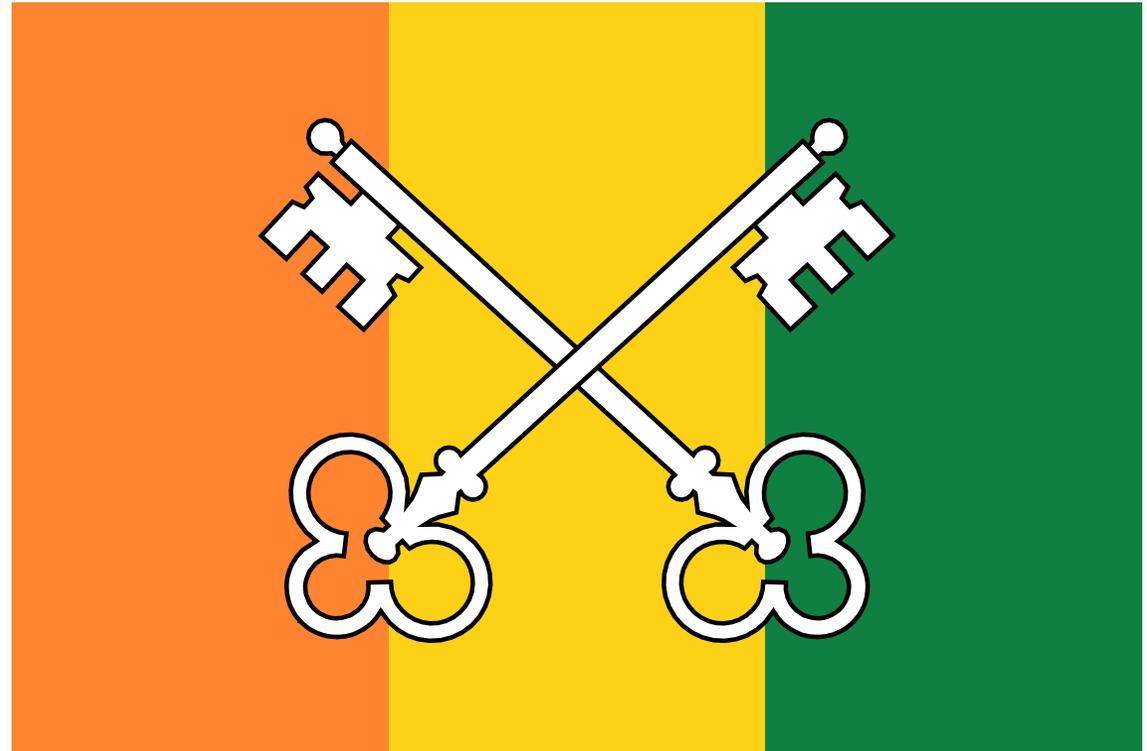

INTRODUCTION TO OUR COUNTRY

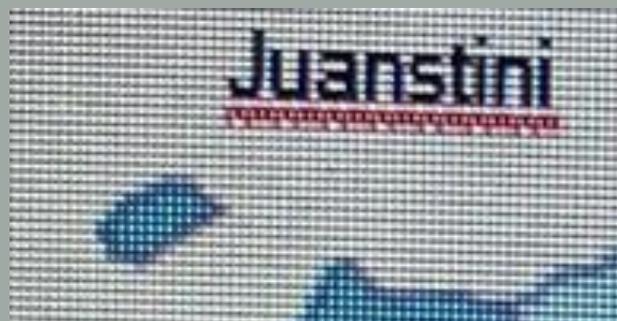

- Juanstini was originally a deserted island at the north of Morocco with a distance of 50x30 miles of territory. The island used to be under water until it was discovered by a villager of the kingdom of Morocco in the late 1800's. The young king Abdelaziz later sold the new found island to one of his closest friends, Juan.

FLAG

- Orange: happiness
- Yellow: freedom
- Dark green: money
- Crossed keys: wealth, power, and safety

LOCATION

ORIGIN

- Juanstini was bought in 1900 by a man called Juan, a French billionaire, for 20 million dollars from Morocco. Juan's main purpose was to have an island when he retired, but he had the idea to make a perfect retirement spot for millionaires.
- The island doesn't have taxes like a normal territory. It gains money by charging an enrollment of 5 million dollars (adjusted to inflation in today's money) for each person that wants to become a citizen. In order to be a citizen, the person has to apply, go through a process of background checks that last 2 years, and have the approval of 51% of the population.

POPULATION AND RACES

- The country is a mix of different races and religions because it has citizens from many countries. Most of the citizens are either white or Arab. The average age of the country is 60 years old, with the range being between 45 and 90 years old. Because of the enrollment for citizens and the expensive cost of living, there haven't been any children that live in the country. Although there have been children born in the country, parents opt on leaving the country or sending them to family members. However, this isn't common because most of the citizens are of the third generation. Finally, there are more women than men that live in the country, mostly because of the Arabs that enroll themselves with their 2 to 6 wives

CULTURE

Language: Bulac

- This language was created because there were so many different languages from people of all over the world and they didnt have an effective way to communicate. This is why Juan decided to créate a language that only islanders would speak and this way they had something different to the rest of the world. Words in the Bulac dictionary include:

Hazu- Hi

Bull- house

Bolish- Good morning

Oli- Water

Pis- Bathroom

Babush- Thank you

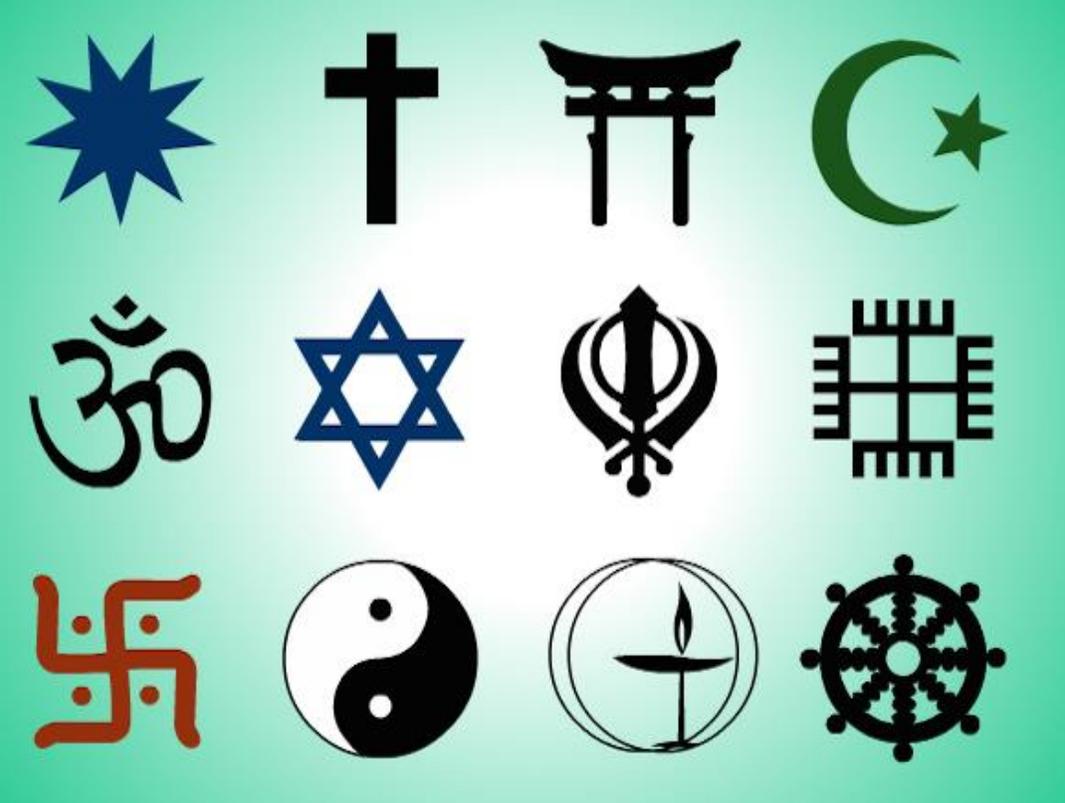

Om- Mother

Esu- Computer

Frum- Car

Regguti- Be happy

Bom- Father

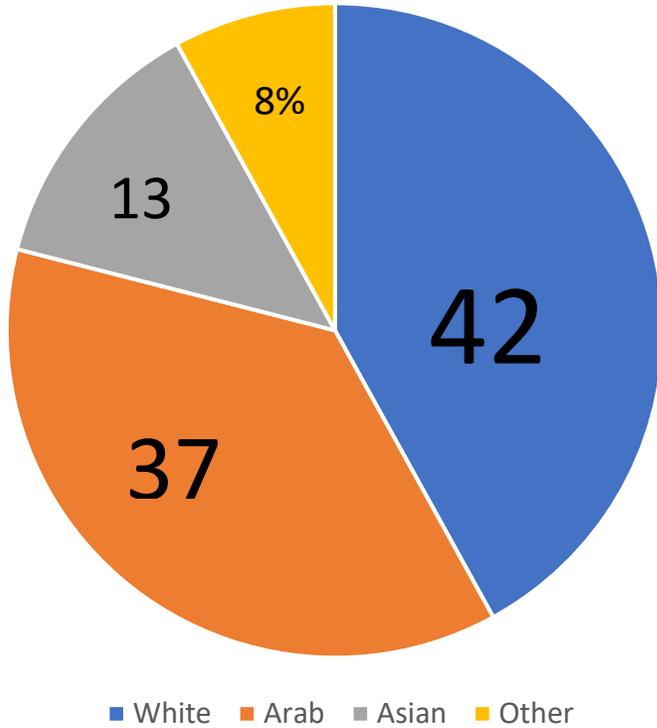

Religion: Free of Choice

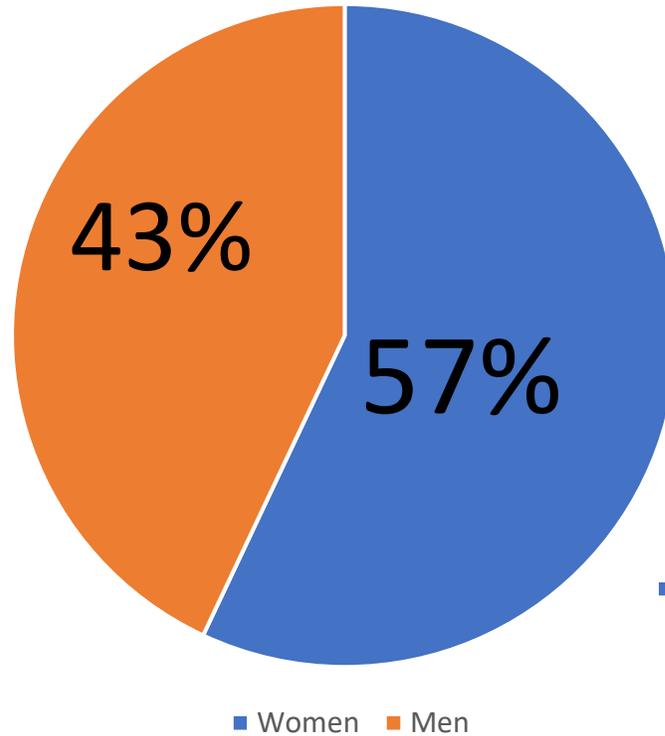

- There is no specific religion in Juanstini because the millionaires that live there are from different parts of the world and have different beliefs. Also, they go there to be happy and in peace so they can believe in anything they want to.

Religions

CULTS AND MUSIC

- The festivals take place in the town center, which is close to the beaches that are visited by the tourists. There is at least one festival a week, this is because of the variety of culture. However, twice a year there is a big party where retired artists that live at the island host the festival (it's obligation to attend). In these parties twice a year the music that's played is reggu.
- Reggu- type of raggae created by the retired artists that lived in the island.

GOVERNMENT

Type of government: Hereditary dictatorship

The Juan (King)- Juan III

- serves until death

Leader (Head of state)- Bula

- it is chosen amongst the millionaires that live in the island by direct elections and serves 2 year terms. (Can be re-elected)

Both of them control the island, the military, and take into account suggestions made by the islanders.

GOVERNMENT

Followers (Representatives)- 20 islanders chosen amongst the rest that have many tasks. They revise admissions from other millionaires aspiring to become citizens. They do constant background checks on the citizens' money. They also give the suggestions made by the islanders and help prepare the festivals. Finally, they have certain rules:

- Are chosen even if they didn't run for the position and are obligated to serve for a 2 year term.
- If they are re-elected, they can deny the offer.
- Main purpose is for every citizen to have at least 1 term.
- Their service is required to be part of the country.

Government positions don't get paid.

LAWS

Juan, in the 1900 only established 4 laws when he bought the island. The reason why there are only 4 laws is because these people are very civilized and peaceful.

The laws:

- Have a recurring net worth of more than 3million dollars (90million now), the money constantly has a background check.
- Attend the twice a year festival.
- Pay the enrollment to be part of the island.
- Serve the country for at least 2 years.

Main law

- The main law is that you need to have a net worth of more than a 90 million dollars. This requirement is because the main purpose of the island is for rich people to retire in peace.

MONEY

Tullis and Pentis

- 1 tulli is equal to 5 dollars, 4.03 Pound sterling and 4.61 Euro.
This is because the islanders wasted too much money and needed higher value money.
- 1 pentis is equal to 0.50 dollars, 0.40 Pound sterling and 0.46

ECONOMY AND TOURISM

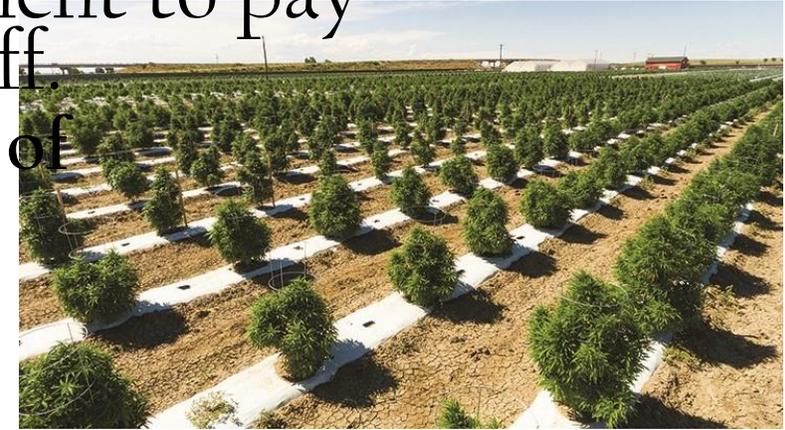

Economy- there two main economies, one is cannabis, but it's sold and consumed by the local citizens; the other is festivals. They use this income to pay the people that work on the island.

Tourism- the country is a stop for only cruise ships coming from Morocco. The people that visit can be part of the festivals and the beaches, but it is forbidden for them to stay if not invited by a citizen.

AGRICULTURE AND MILITARY

Agriculture- Cannabis is produced and controlled by the government to pay the island's staff.

Only for the use of islanders.

Military- is a very guarded island with more than 300 military officers that patrol the country and its coasts.

ISLAND RESOURCES

There aren't any resources grown or fabricated in the island because money has never been a problem. All islanders buy their food, clothes, and utilities online and get them shipped to the island. This isn't the most economic wise choice, but the islanders have never really cared about saving some extra money.

TREATY OF IRRELEVANCY

1902

In 1905, Juan pleaded to his friend, the Moroccan king, for neutrality for any type of conflict. He also asked king Abdelaziz that they wouldn't be bothered in any way. After this, Morocco signed the Treaty of Irrelevancy. This treaty meant that the island of Juanstini will be never bothered and treated as if they didn't exist. The Moroccan government also agreed to keep the island protected from other countries. In exchange, they shall open their doors to anyone who wants to visit the Island. This is why the island hosts two mandatory festivals which are meant for the islanders to greet the visitors coming from Morocco. Because visitors aren't allowed to stay in the island, they have to later go and stay in Morocco which means that they would profit from tourism. This treaty has been intact since its initiation.
